What is the brake hydraulic system? Nearly all passenger vehicles use the very reliable hydraulic brake system. At a minimum, the system is composed of a master cylinder, which pumps brake fluid through brake lines, wheel cylinders or brake calipers that actuate the brake pads or shoes, and brake rotors or brake drums that rotate with the wheel until acted upon by the pads or shoes.

### Acura Vigor Brake Bleed Cost Estimate - RepairPal.com

The brake caliper is the hydraulic component of the disc brake system. Brake calipers compress the brake pads on the rotor surface to stop your vehicle. Over time, brake calipers may develop leaks or the piston inside the caliper may stick. This causes your brake pads to be in constant contact with the rotor and may cause uneven or premature wear.
