Track gauge or rail gauge (also known as track gage in the United States) is the distance between the inner sides (gauge sides) of the heads of the two load bearing rails that make up a single railway line. Each country uses different gauges for different types of trains. However, the 1,435 mm (4 ft 8 + 1/2 in) gauge is the basis of 60% of the world's railways.

6. Determine the value of $\angle 2$.
2. Statement Reason
 $\angle 1 = 40^\circ$ Int. \angle 's of a Δ
 $\angle 2 = 180^\circ - 40^\circ - 80^\circ = 60^\circ$ Co-int. \angle 's ; DF // BC.
7. You are given the following information regarding the diagram below:

Mathematics Grade 9 1 Geometry

In mathematics, a fractal is a subset of Euclidean space with a fractal dimension that strictly exceeds its topological dimension. Fractals appear the same at different scales, as illustrated in successive magnifications of the Mandelbrot set. Fractals often exhibit similar patterns at increasingly smaller scales, a property called self-similarity, also known as expanding symmetry or unfolding ...
