Ishiharas Tests For Colour Blindness

Ishihara's Test for Colour Deficiency: 38 Plates Edition. Dr Shinobu Ishihara introduced in 1917—almost 100 years ago—the most well known color blindness test. Each of his tests consists of a set of colored dotted plates, each of them showing either a number or a path. Since then this is the most widely used color vision deficiency test ...

Ishihara's Test for Colour Deficiency: 38 Plates Edition ...

The full Ishihara test consists of a set of 38 plates and tests in-depth for color blindness. The plates here are a small representative sample of the whole, but will help spot the most common forms of colorblindness. Depending on the color balancing of your monitor, the tests may be somewhat more or less effective (e.g. if your monitor is not ...
