Leica 1200 Robotic. The new Leica robotic total station requires the activation of the “Extended GeoCOM” option before it will allow the use of third party data collection software (i.e. SurvCE or Carlson Field). Activation Information: The following information was provided by Leica in document Su11-05G.

Total Station (Leica Robotic)

GEO Serial Interface (GSI) is a very popular data format, used by many Leica total stations (TPS) or Digital Levels (DNA). It is stored as ASCII text, with one line per measurement. In each line, there can be several blocks of data, with a blank space as a separation. There are two variants of GSI: GSI8; GSI16
