A cathode-ray tube (CRT) is a vacuum tube containing one or more electron guns, the beams of which are manipulated to display images on a phosphorescent screen. The images may represent electrical waveforms (oscilloscope), pictures (television set, computer monitor), radar targets, or other phenomena. A CRT on a television set is commonly called a picture tube.

However, even though the need for the bulky picture tube and electron beam scanning of those older CRT TVs is not required, Plasma TVs still employ burning phosphors to generate an image. As a result, Plasma TVs suffer from some of the drawbacks of CRT TVs, such as heat generation and possible screen burn-in of static images.

### The Difference Between an LCD TV and a Plasma TV

There is a piece of tape on the bottom of the screen. Just click on monitor or appropriate color to make it full screen. Black screen when connecting Mac to a projector. The T-con board is part of the LCD panel. (repair tv double image problem) LG TV CRT TV White screen no picture, remote not
