### Models For Quantifying Risk Actex

In probability theory and statistics, the coefficient of variation (CV), also known as relative standard deviation (RSD), is a standardized measure of dispersion of a probability distribution or frequency distribution.It is often expressed as a percentage, and is defined as the ratio of the standard deviation to the mean (or its absolute value, |*μ*|). The CV or RSD is widely used in analytical ...

### Coefficient of variation - Wikipedia

Life expectancy is a statistical measure of the average time an organism is expected to live, based on the year of its birth, its current age, and other demographic factors including sex. The most commonly used measure is life expectancy at birth (LEB), which can be defined in two ways.Cohort LEB is the mean length of life of an actual birth cohort (all individuals born in a given year) and ...
