NEEDHAM, Mass., August 24, 2021 – According to a new forecast from the International Data Corporation Worldwide Quarterly Personal Computing Device Tracker, worldwide shipments of PCs are expected to grow 14.2% to 347 million units in 2021. This is down from IDC's May forecast of 18% growth with continued supply chain and logistical challenges cited as the main reasons.

Worldwide Shipments of PCs and Tablets Will Maintain ...

PCs for People's model contributes to environmental sustainability by intercepting usable computers before they reach landfills and refurbishing them for reuse. Businesses typically retire computers long before their usable life is over and this has contributed to America becoming the largest producer of electronic waste in the world.
