The same percentage of the Moon will be lit up no matter where on Earth you are. The orientation of the Waxing Crescent Moon depends on the time, the date, your location, and the Moon's position in the sky. Exactly which part of the Moon is lit up—the top, bottom, or the side—also depends on how high the Moon is in the sky.

Also, if I'm gonna watch Sailor Moon in English, I'd prefer the OLD dub for nostalgia purposes, which this set doesn't have. So basically I'm stuck watching something in a way I really don't feel like watching it. I wonder if subsequent releases also have this issue. USED, not NEW. HARDSUBBED, CANT WATCH RAW.
