Nursing Management. Most infants and children with otitis media are cared for at home; therefore, a primary responsibility of the nurse is to teach the family caregivers about prevention and the care of the child. Nursing Assessment. Assessment of a child with otitis media include the following: Physical examination.

Otitis Media Nursing Care Planning and Management: Study Guide

Arrange nursing tasks in a way, so they are distributed throughout the entire shift. Enough time between painful activities and procedures allows the patient to rest and recover for the next task. This system of sufficient recovery time after activities ensures appropriate pain control and may increase compliance.

The Wong-Baker Faces Pain Rating Scale is a pain scale that was developed by Donna Wong and Connie Baker. The scale shows a series of faces ranging from a happy face at 0, or "no hurt", to a crying face at 10, which represents "hurts like the worst pain imaginable". Based on the faces and written descriptions, the patient chooses the face that best describes their level of pain.
